Parking Network Exposure

Parking Network reviewed

The parking network is undergoing a large change regarding to exploiting the newest techniques in web development. The new parking-net community software (referred at as parking-net 2.0) was evaluated by Atos Origin. We were able to give them a good impression about what this community software could mean for a website. Atos Origin was very impressed of the fact that a relative small market could get so many traffic. With the new software we are going to exploit this advantage, by giving the visitors even more opportunities to share their knowledge and facts!

Marketing

ABOUT PARKING NETWORK IN MORE DETAIL...

How did the story start?

'8 years ago, there was the idea to centralize all the information concerning parking at one place on the Internet. In co-operation with the EPA, this platform was launched in 1996 and has grown into the worlds largest information source on parking.'

Why is Parking Network a success?

'The parking industry is overloaded with information. Finding qualified information is difficult. Due to time constraints professionals cannot read all this information. Parking Network gives the professional the opportunity to find well structured qualified information in one place on the Internet at any time and any place without any costs. Also, the platform enables the visitor to find unbiased vendor information.'

What can I find in Parking Network?

'In Parking Network you can search for companies indexed on their activities and solutions. Furthermore news, associations, showcases, literature, library, events, a forum and awards can be found. We send on a monthly basis an electronic update by e-mail. I would say: "Go there and find out for yourself."

How do we get visitors to Parking Network?

'First of all Parking Network is indexed very high in all the major search engines. As an example in www.google.com on the keyword 'Parking', we are listed fifth. This is very high. Secondly, more than 500 web pages link to Parking Network as a valuable information source. For the marketing of Parking Network we work closely together with all the associations worldwide, the traditional media, tradeshow organizers, specialty societies and research institutes. The platform is managed by a community management team who send out on a frequent basis emails to the targeted audience. This all results in a visitor basis of more than 30.000 unique professionals who frequently visit Parking Network to find their information of interest.'

Who visits Parking Network?

'You can imagine that this platform gives the industry a very good overview of the parking industry worldwide. Therefore we attract the following visitors: public bodies, awarding authorities, project developers, the urban planning specialist, infrastructure consultants, purchase managers, and other persons interested in the latest developments in the parking industry.'
