

# Skyline L-Park

More parking in less space...anywhere.

**L-Park Technology - for intelligent, cost effective and flexible parking solutions anywhere.**

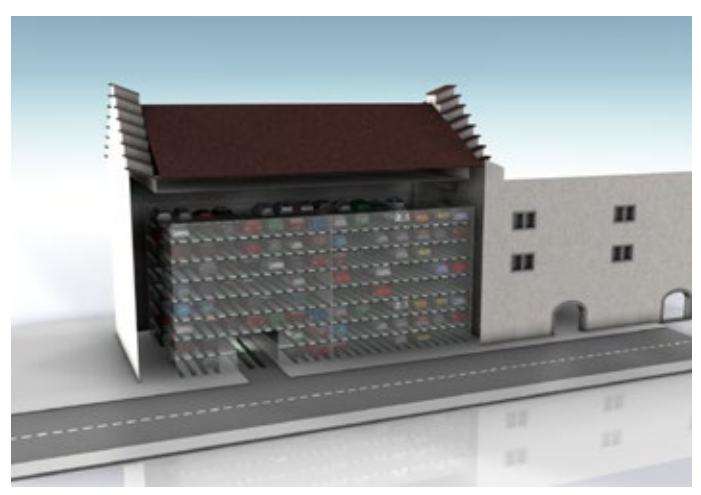

Rapid, reliable and flexible car transport technologies ensure highest levels of customer service and return on investment.

**Patented innovation that sets new standards**

- Highly flexible configuration
- For use above, under or inside new or existing structures
- Car retrieval times of under 60 seconds
- For 60 to several thousand cars per installation
- Adapt the parking layout to suit your building
- Secure & spacious parking lobbies
- Double the density of conventional parking

**Typical application areas**

- New or refurbishment installations incl.
  - Historical buildings
  - Commercial offices
  - Premium residential developments
  - Airports
  - Retail
  - Hotels
  - Hospitals

# Skyline L-Park

More parking in less space...anywhere.

With the L-Park system Skyline Parking offers the highest flexibility and scalability.

Choose the right composition for **YOUR** project:

- Number of parking places
- Number of vehicle entry and exit lobbies
- Number of parking levels
- Inside, under, attached to buildings or on irregular shaped area

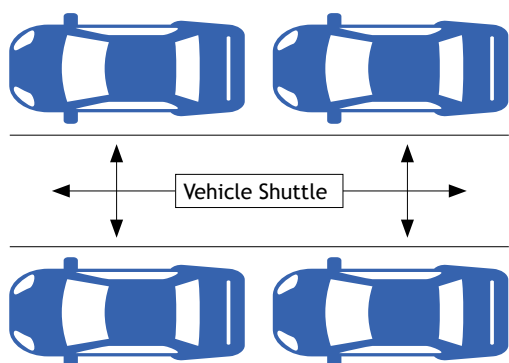

To understand how to answer these questions ask for the **Skyline Parking APS Design Guide** ([info@skyline-parking.com](mailto:info@skyline-parking.com)).
