Mobile Solutions

Empower your employees and customers with meaningful mobile experiences

Parking Technology HUB

EMPOWER YOUR EMPLOYEES AND CUSTOMERS WITH MEANINGFUL MOBILE EXPERIENCES

HUB Parking Technology constantly strives to innovate and develop new seamless and intuitive mobile solutions that smoothly integrate with daily operations and improve the user experience everywhere.

The changing needs of parking management and evolving technologies require total system solutions. Additionally, end users are becoming more and more demanding, expecting a smooth and quick parking experience. HUB has developed multiple mobile solutions that address current and future challenges of parking operators and grant **stress-free** parking to drivers.

In particular:

- Help end users maneuver through the urban maze efficiently, getting to their destination more quickly, saving time and without stress.
- Allow owners/operators to better control and manage their parking facilities, plan and increase business revenue, understand their clients and easily reach/inform/communicate with them.

Mobile Solutions for Operators

JMS MOBILE APP

Access valuable data about your business **anywhere and anytime** with the JMS app, the mobile version of the Janus Management System.
Among HUB mobile solutions for operators, the JMS app gives you the possibility to remain connected to your business easily even when you are on the go and to bring all the power and advantages of the JMS management system to your smartphone or tablet.

You can:

- Manage multiple parking locations
- Monitor and access complex reports and analysis
- Improve decisions through data that is always on, instant, and easy-to-access
- Ensure 24/7 connectivity to the business.

JMS is reliable, flexible, and perfectly adaptable. From the smallest installation, to the most complex project with the highest traffic level, it provides the capability to manage the operations of multiple parking locations with the same easy and extremely intuitive user interface.

Mobile Solutions for Operators and Merchants

MERCHANT APP

As a parking operator or a local merchant, you can reward your customers' purchases easily and quickly with the JMS Merchant app: turn your smartphone or tablet into a powerful validation unit and simplify operations!

Ticket ID number, barcodes and digital tickets (stored in JPass) can be scanned by merchant staff via the device-embedded camera, and the desired **parking fee discount applied in real time** by simply tapping on the screen.

Available for iOS and Android phones and tablets.
An ideal solution for complex environments such as shopping malls, granting benefits for:

PARKING OPERATORS

- Enhance business performance by setting up a structured validation program, with multiple permission levels
- Forecast and optimize parking revenues by co-operating with nearby businesses
- Painless and detailed auditing/reporting of the validations applied, thanks to full integration with JMS
- Higher customer loyalty thanks to a structured discount program

SHOP OWNERS

- Simplify clerks' operations, without additional hardware requirements
- Easy set-up and selection among multiple validations, applicable to a single ticket: percentage discount, money discount, time discount, rate change, total validation
- Powerful promotion tool
- Quick monitoring of the validation environment

END USERS

- Flawless payment and exit, without any additional paper voucher or receipt to scan at pay stations/exit lanes other than their parking ticket
- Completely paperless parking if they are using JPass and its digital voucher

HUB's Merchant Validation is also available for desktop devices, with the additional print-on-file functionality that allows to print vouchers on paper or on electronic file and send vouchers via any media: social media, magazines, emails, packages, stickers and many more, enhancing the customer experience.

MOBILE CASHIERING

Fully geared to handle patrons' needs in high traffic events, HUB mobile cashiering is the ideal handheld solution that enables operators to manage parking payments onsite, and allows customers to choose the payment method according to their preference. Operators can simply and instantly convert their daily garage to handle event parking. It's the ideal solution for stadiums, convention centers, concert venues, municipal garages and much more.

OPERATORS CAN:

- handle cash and electronic payments: chip&pin, magnetic stripe, NFC, ApplePay, SamsungPay
- scan parking tickets
- apply validations
- address lost ticket issues
- track & arrange all transactions into complex statistics, thanks to JMS reporting functionalities

The device can be used in conjunction with an external portable printer to quickly print receipts on the go, thus delivering effective mobile assistance to customers. The ideal solution for event locations providing additional **flexibility and service** when needed.

Mobile Solutions for End Users

JPASS

JPass provides users with the key to enter the fourth dimension of parking, offering search, navigation, pre-booking, digital visitor and monthly access and payment. Forget about paper tickets: thanks to JPass and the Bluetooth technology embedded in HUB's peripherals, customers can now enter, securely pay and exit a parking lot using their smartphones!
JPass elevates the parking experience for users and provides valuable user data for owners and operators.

BENEFITS FOR OPERATORS

- **Enhanced occupancy management and predictability**: thanks to total control over bookings and inventory management, enabling more predictability and better occupancy management, reducing operational costs and offering more convenience to end users.
- **Contract parking**: online sales of Subscriptions enable the ability to save time and resources as the end user can create a new contract in a few seconds at anytime and anywhere, and the operator can set up thresholds and control the process.
- **Digital ticketing**: less maintenance needed on the equipment, more environment friendly, no cost for paper tickets.
- **White Label Version**: reinforce your own brand and build a stronger relationship with your customers, with the power of JPass embedded in your company-branded app.
- **Reach clients** through notifications. Send discount vouchers to easily share promotions and special discounts with your customers and increase revenue.
- **Valuable business insights** about your customers (and transients) and plan long-term business strategies to maximize potential profit.

BENEFITS FOR USERS

- **Park quicker**: JPass shows you the parking locations in the area you select and the real time occupancy information and drives you there directly. No more guessing about where you will find a parking spot and driving in circles to find an available garage!
- For **additional peace of mind**, users can book in advance using the pre-booking functionality.
- In-app payment functionality for a **secure and flawless payment**. Users can avoid queuing to pay and do it conveniently and securely from their phone.
- Completely **paperless experience** with e-tickets safely stored in the app. Go green!
