

Curbs | Parking | Mobility

- Street Assets Mapping
- Curb Regulations Digitization
- Easy to maintain and update

Street Assets Map

Unlike expensive and time-consuming traditional methods, we can map and display asset data systematically in a short amount of time even for large cities.

- Mapping service provided
- Accurate coordinates
- Easily maintain
- Various road assets
- Detailed attributes
- Guaranteed update

Curb Rules Map

One street section can be ruled by several different assets such as parking signs, hydrants and bus stops. PolaGIS now is able to generate and visualize regulations automatically.

- Supported by our own high-quality assets data
- Able to integrate all types of data sources
- Sorted by different vehicles types and time segments

To make smarter cities, a smarter data foundation should be built. We provide the best way to help people from different industries to get easier access to mobility.

city planning, public works

Reduce labor and management expenditure. We provide integrated service and quality control for your planning. Boost your efficiency of parking enforcement.

last-mile navigation

No more wandering around your destination. Less driving pressure with better customer service. Our data can also be directly used to make delivery routes.

autonomous driving

HD Maps support self-driving vehicles to know street circumstances in advance. Our accurate map features and valuable parking regulations are key elements in the future.

Collect

Remotely map any objects or paintings on the streets.

Improve

Eliminate your outdated and incorrect data.

Integrate

Integrate your existing data sources.

Display

Display assets on map with well-organized design.

Maintain

Easily share, manage and export to analyze your data.

Update

Guarantee frequency in updating data.

About Us

Headquartered in Boston, PolaGIS specializes in providing map data for various street assets and curb regulations. Utilizing innovative techniques, we aim to bring people easier access to mobility information by connecting everything on the streets to the map. We are passionate about collecting, translating, and displaying valuable map data for all customers to manage and maintain.
